

# GROUND GUARDS

## PROTECTION FOR SOFT OR SENSITIVE AREAS

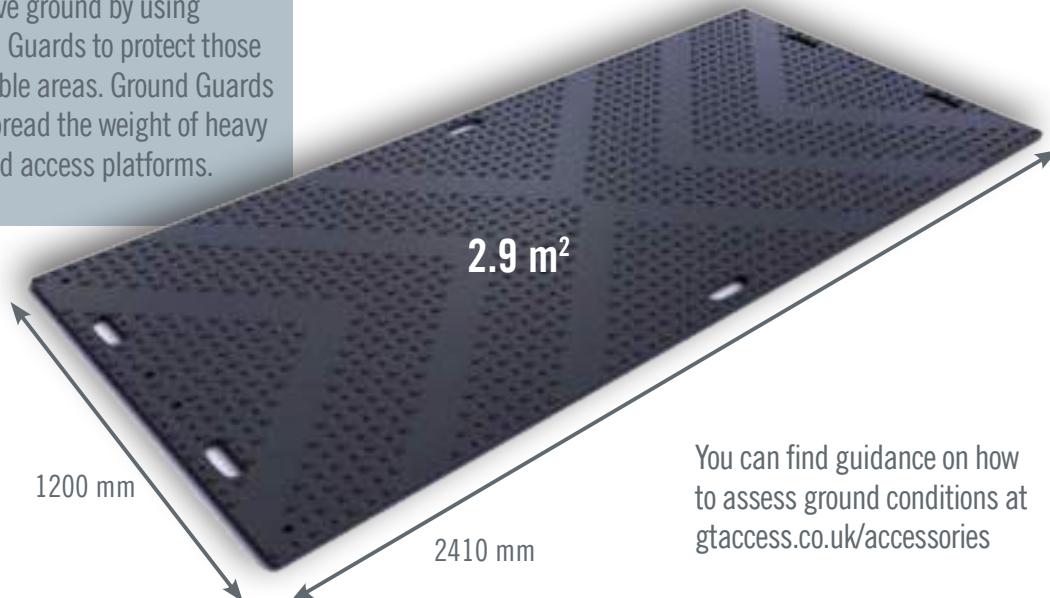

## THE PERFECT ROAD SURFACE

These tough, connectable and man-handleable road mats provide essential temporary access and ground protection on soft or sensitive ground. Ground mats can remove the need for costly reinstatement once the project is complete.

Remove the need for costly and time consuming reinstatement to lawn, paving or other sensitive ground by using Ground Guards to protect those vulnerable areas. Ground Guards help spread the weight of heavy powered access platforms.

Available for hire and delivered for free with your powered access platform

You can find guidance on how to assess ground conditions at [gtaccess.co.uk/accessories](http://gtaccess.co.uk/accessories)

### The benefits of using Ground Guards

- Fast and easy to install using 2 or 4 way connectors
- Supports loads up to 80 ton
- Lightweight 35kg mats make handling easy
- Unique Chevron Traction surface for superior grip and reduced slippage
- Environmentally friendly 100% recycled HDPE
- Ideal for usage over soft or sensitive ground
- Removes the need for costly reinstatement of vulnerable ground surfaces
